

Website Hosting

Chariot Creative now has two dedicated servers for our clients located in the US, and one server in the UK. We have set very aggressive traffic limitations for our servers in order to maintain the fastest server speeds possible for our clients, period. Hence, the purchase of our second dedicated server, in December of 2016.

Server info:

Linux Server, using Apache
 Intel Xeon E3-1275 V3, Single CPU, Quad Core
 4 cores and 8 threads, up to 32GB RAM
 1TB Enterprise HD or 128GB SSD HDD
 GIGE network port
 15,000GB Premium Bandwidth

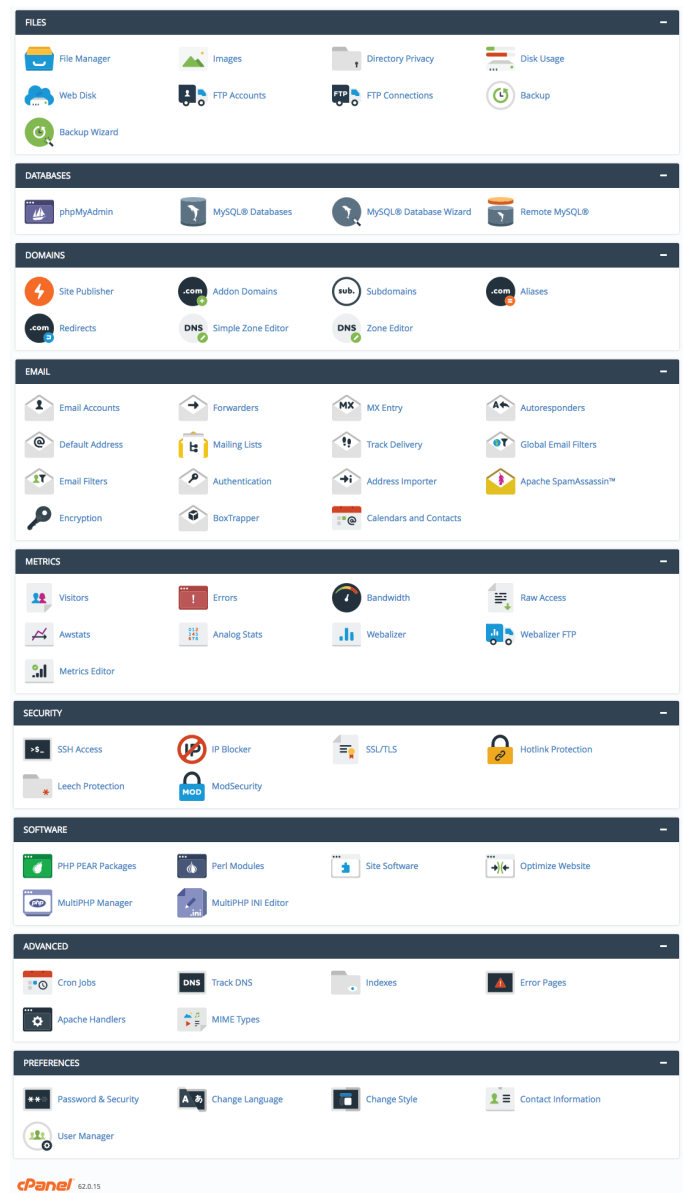

\$25 per month

with 1 year agreement

1 SSL Certificate included (RapidSSL)

Features:

- Daily Backups
- Up to 2 sub-domains
- 1 SSL Certificate
 - Highly recommended for any site. Google now prioritizes the ranking of websites with SSL certificates above non-secure sites. Includes one RapidSSL (DV) certificate via our master registrar account with Name.com with whom we have a longstanding partnership with.
- Up to 2 MySQL Databases (E.g. 1 MySQL database is needed to run a Wordpress site)
- Free transfer of website files to the new server
- Unlimited Bandwidth and Unlimited Storage
- Tech Support will be *us* at Chariot Creative - not some third party located in another country. We will respond immediately to resolve issues if they ever arise.
- Private C-panel access to your own account. With this you have full control, if needed, in order to:
 - Manage Web Files, Backups, and Security
 - Create and Manage FTP accounts
 - Create and Manage Emails, Forwarding, Filtering, etc.
 - Create and Manage Domains, Sub-Domains, and Redirects
 - MySQL Databases, and PHPMyAdmin
 - ... and much more.
